

Exercise 2:

```
interface PaymentProcessor {  
    void processPayment(double amount);  
}
```

```
class PayPalGateway {  
    public void makePayment(double amount) {  
        System.out.println("Payment of Rs." + amount + " processed through PayPal.");  
    }  
}
```

```
class StripeGateway {  
    public void pay(double amount) {  
        System.out.println("Payment of Rs." + amount + " processed through Stripe.");  
    }  
}
```

```
class PayPalAdapter implements PaymentProcessor {  
    private PayPalGateway paypal;  
  
    public PayPalAdapter(PayPalGateway paypal) {  
        this.paypal = paypal;  
    }  
  
    public void processPayment(double amount) {  
        paypal.makePayment(amount);  
    }  
}
```

```
}  
}
```

```
class StripeAdapter implements PaymentProcessor {  
    private StripeGateway stripe;  
  
    public StripeAdapter(StripeGateway stripe) {  
        this.stripe = stripe;  
    }  
  
    public void processPayment(double amount) {  
        stripe.pay(amount);  
    }  
}
```

```
public class AdapterPatternTest {  
    public static void main(String[] args) {  
  
        PaymentProcessor paypal =  
            new PayPalAdapter(new PayPalGateway());  
  
        PaymentProcessor stripe =  
            new StripeAdapter(new StripeGateway());  
  
        paypal.processPayment(1000);  
        stripe.processPayment(2000);  
    }  
}
```

```
}  
}
```

Output:

Output

```
Payment of Rs.1000.0 processed through PayPal.  
Payment of Rs.2000.0 processed through Stripe.
```

```
=== Code Execution Successful ===
